

# Assignment 3

Xinhui Zhao & Baiyu Li

## CLASS DIAGRAMS

Each graduate have a unique student ID to log into the school system, and related to the ID, his/her name, gender, major, college, the date of graduation and the courses have taken in university have be recorded in the database. One graduate attended many courses and one courses have many students. A course need its name, ID, capacity in int, and contents, a course must have one teacher, but a teacher can conduct 0 to many courses. The teacher class have its members of name, ID, gender and college, too. One graduate could only study in one major, and a major have 0 to many students, and many course compose one major. The major class has its name, ID, student number and teacher number. One graduate just take one job at a time, and in job class, the job name, the graduates' salary and position need to be recorded, and the promotion should be updated during the working period.

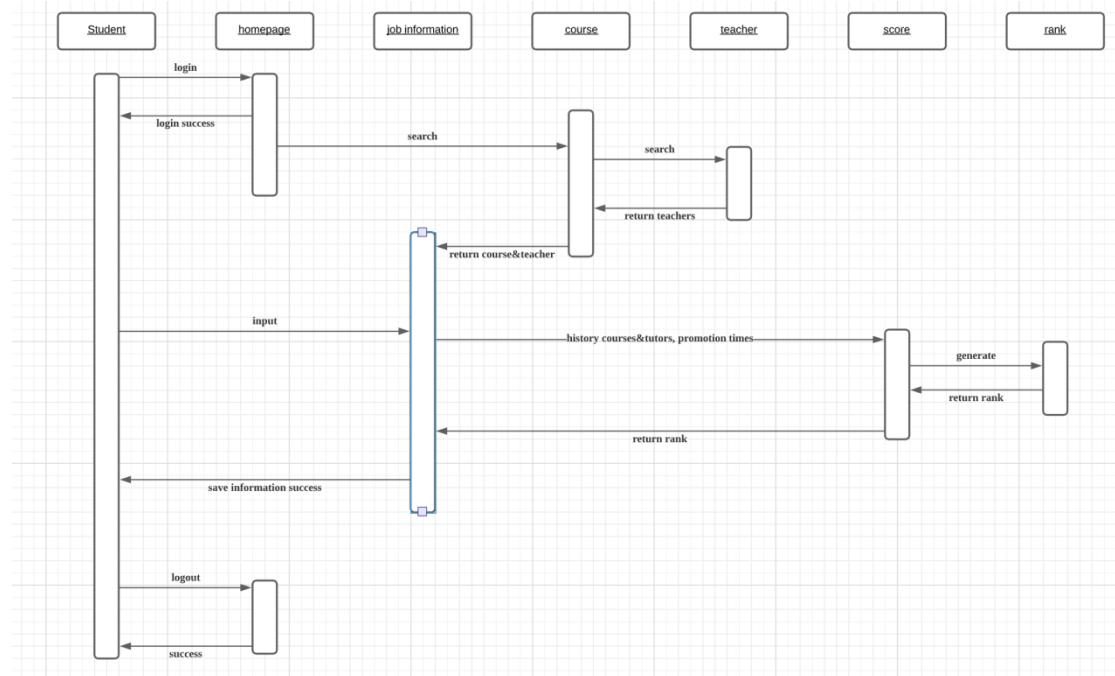

## Sequence diagrams

### 1. graduation input their job information

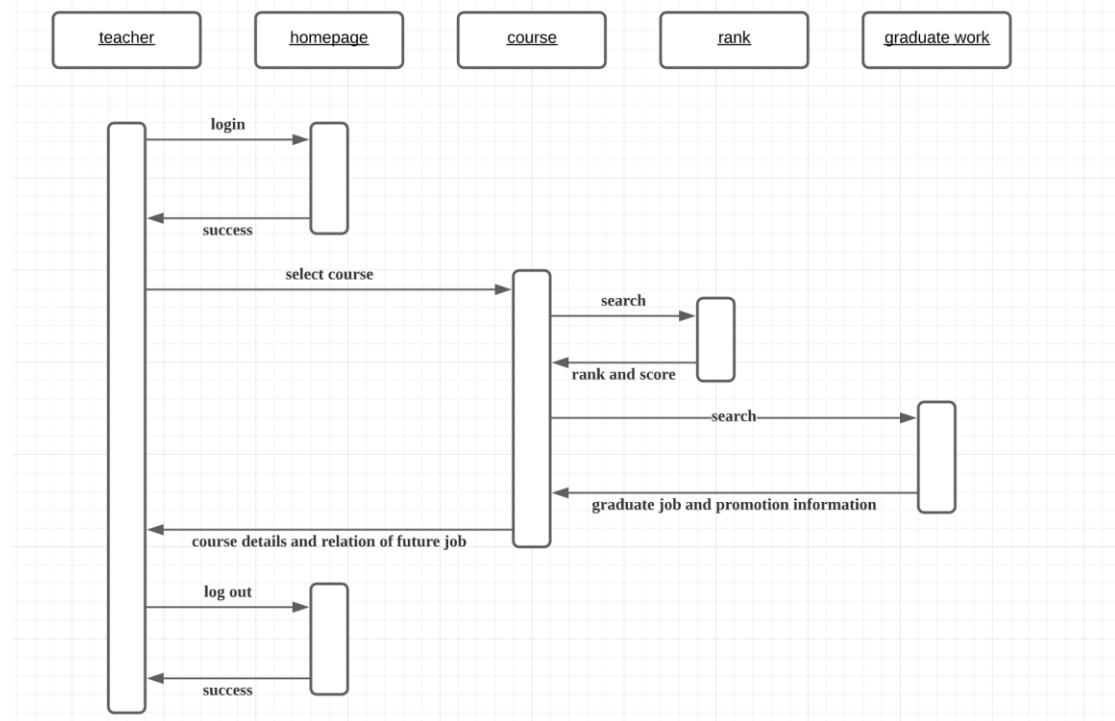

The graduations need to log in with their student ID, and the homepage will return back the success message. And then, the information of the graduate related to the student ID, such as name, major, course history can be search and return from the database to the job information page. When the user input his/her job information, assuming the lowest position in his/her company is zero, and the parameter of promotion is not promotion times but the level between current position and the lowest one. Among students of one course, the salary and promotion parameter will be put together and calculate the arithmetic means, the means

will be rank by their values and recorded along with details of job information.

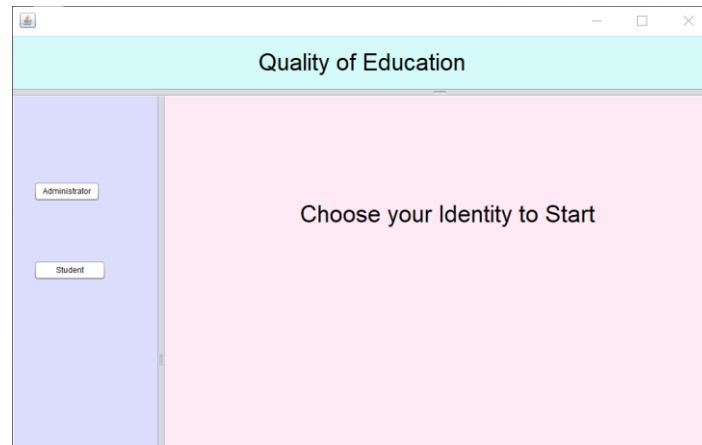

## 2.teacher view the promotion rank and the relation between course and job

When the teacher log in with teacher ID, they can select a course and the database will search and return the rank, score and details of graduation job, these information will be shown on the interface. And teachers can view what courses are more helpful for the students and which are not, and the mentor of these courses can also be viewed. It will bee clear for teacher and college to make some improvements to conduct more useful contents.

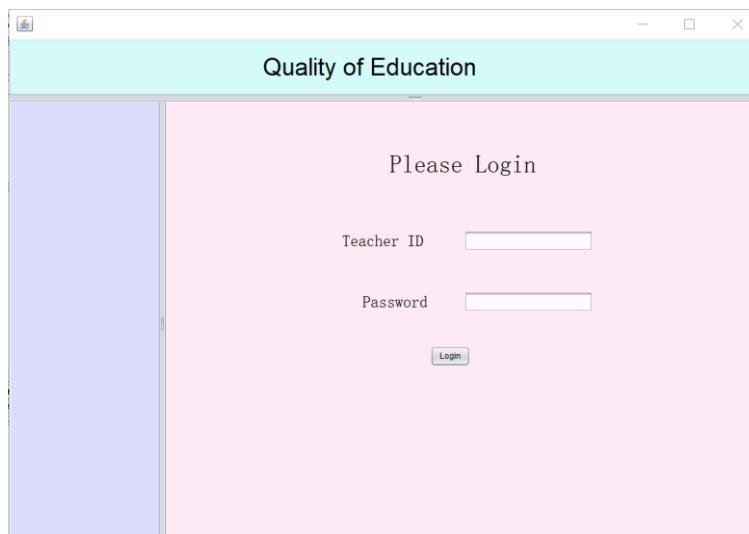

# Application Design

In the main frame, we need to select the user identity first by clicking the button. The Administrators part is used for teacher to view students' general information and get the ranking of the graduate students. And in student part, it allows student to add and edit their personal information and job situation.

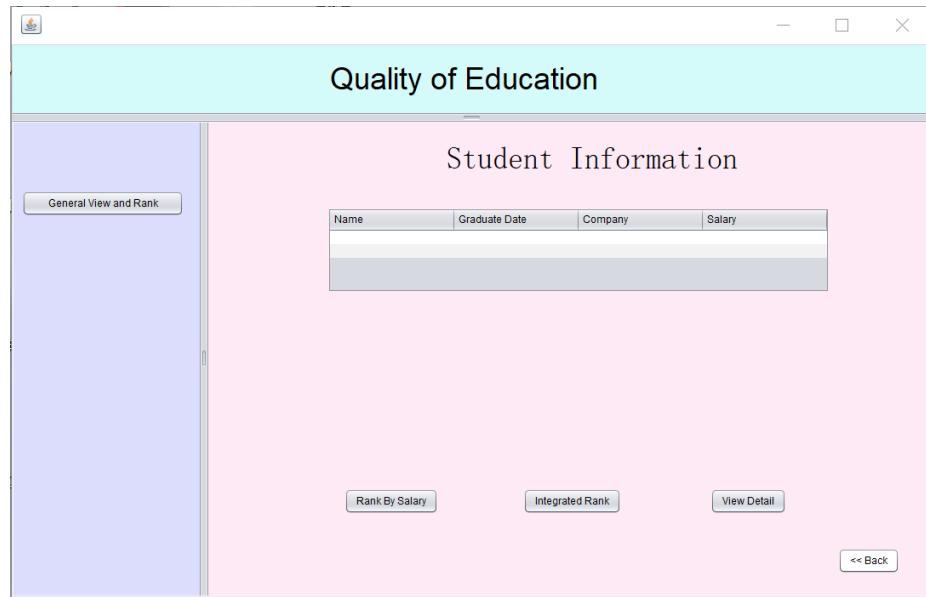

## Administrator Part

In the administrator part, before user start to view, they need to use their id number to login.

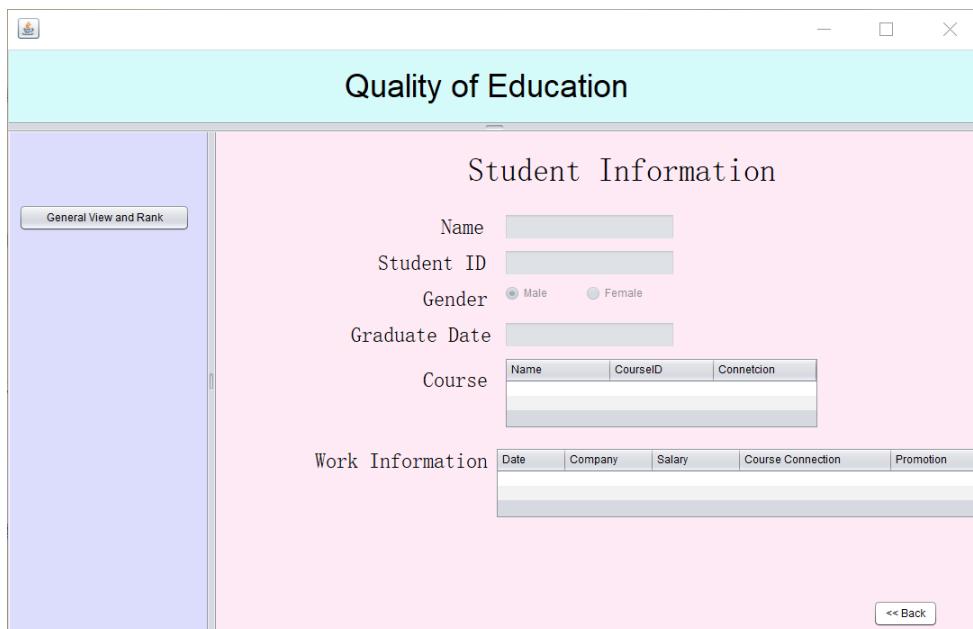

After successfully login, it will appear this interface, which is the student general information that include student name, company, salary, and graduate date. When click the rank by salary button in the lower left corner, the data in the table will displayed in the order of low to high wages. When click the integrated rank button, it will be based on our algorithm scores to sort an integrated ranking. Both sorts allow administrator to have a rough idea of student situation. At the same time, the administrator can also select a row of students and click the view detail

button to view the detail information of that student.

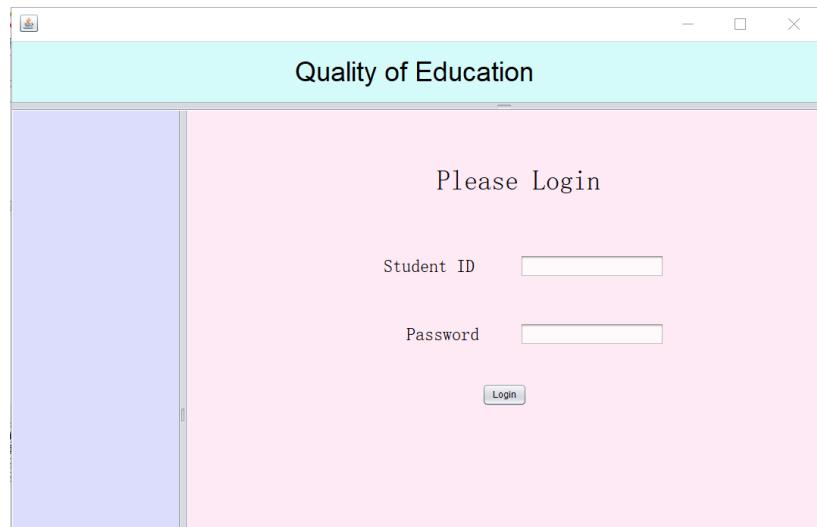

This is the interface of view the detail information of specific student. The top half of the interface is the basic personal information of the student. The following course table shows information about all the courses student took during the whole study process. Connection expresses the degree to which the student thinks the subject is relevant to his current job. The bottom work information table shows the details of the student's work information, which including the company, salary, promotion situation and the overall evaluation of curriculum relevance to the job.

The left side button on both these two pages is used for administrator to go to the student general information page, which is also the first page.

## Student Part

As for the student part, before any operation it also requires student to login with their student id first.

Once the student successfully logs in, the interface will jump to the student information page. Similar with the student information page at administrator part, the top half of the page is the student's personal basic information. The bottom half of the page has two tables, course table and job information table. In course table, if student select one of the rows and click the view details button on the left, the page will jump to edit course connection page, which student can view and modify the connection between the course and job. Similarly, if the student selects a row in the work table, and click the view details button on the left, the page will jump to add or edit job information page, which student can check and change the job detail.

The image shows a window titled "Quality of Education". The main area is titled "Student Information". It contains several input fields and buttons: "Name" (text box), "Student ID" (text box), "Gender" (radio buttons for Male and Female), "Graduate Date" (text box), "Course" (table with columns Name, CourseID, Connection, and a "View Detail" button), and "Work Information" (table with columns Date, Company, Salary, Course Connection, Promotion, and a "View Detail" button). At the bottom are "Edit" and "<< Back" buttons. On the left, there is a sidebar with buttons: "View Student Information", "Add/Edit Course Connection", and "Add/Edit Job Information".

The course edit page allows students to adjust how much they think the course is relevant to their current job. They can drag the button to express the percentage of relevance they think. Of course, on this page, they can only go changing the degree of relevance, which means they does not allow to modify other content, such as the course name or course ID.

This screenshot shows the 'Edit Course Connection' page. The title bar reads 'Quality of Education'. On the left sidebar, there are two buttons: 'View Student Information' and 'Add Job Information'. The main content area is titled 'Edit Course Connection'. It contains three input fields: 'Course Name' (text input), 'Course ID' (text input), and 'Course Connection of Job' (a slider with a blue dot). Below the slider are two buttons: 'Edit' and 'Submit'. In the bottom right corner of the main area, there is a 'Back' button labeled '<< Back'.

In the job information interface, students can view and modify their company names, positions, and salaries. In the promotion option at the bottom, student can click on two radio buttons to choose whether they have been promoted. And the one submission of a promotion will get a bonus points in subsequent rankings. The application will also get the update time automatically when student click submit.

This screenshot shows the 'Edit Job Information' page. The title bar reads 'Quality of Education'. On the left sidebar, there are two buttons: 'View Student Information' and 'Add Job Information'. The main content area is titled 'Edit Job Information'. It contains three input fields: 'Company Name' (text input), 'Position' (text input), and 'Salary' (text input). Below these fields is a 'Promotion' section with three radio buttons: 'Yes' (selected), 'No', and 'Not Suitable'. At the bottom of the page are 'Edit' and 'Submit' buttons, and a 'Back' button labeled '<< Back' in the bottom right corner.

Besides these three pages, the button on the left also allow student to go to the student information page or go to add some work changes. The add job page is extremely similar with the edit page.

The screenshot shows a window titled "Quality of Education". On the left side, there is a sidebar with a light purple background. It contains two buttons: "View Student Information" and "Add Job Information". The main area has a pink background and is titled "Add Job Information". It contains the following fields:

- Company Name: An input field.
- Position: An input field.
- Salary: An input field.
- Promotion: A radio button group with three options: "Yes" (selected), "No", and "Not Suitable".
- Submit: A button to submit the form.
- << Back: A link to return to the previous page.
